

MasterWean®

MOSEGÅRDEN A/S

## MasterWean® Supplementary and complete feed blends

- Fresh feed at all times for the piglets

### Supplementary feed:

An increasing number of pig producers mix their own weaner feed because of cost savings and to ensure truly fresh feed partially based on ground corn and supplementary feed

Mosegården has a strong concept of supplementary weaner feed made in close co-operation with our suppliers

#### MasterWean® Classic 20%

Admix with 20% together with 65% corn, 10% fish meal and 5% fat.  
Can easily be combined with a soya protein-concentrate

#### MasterWean® Classic 30%

Admix with 30% together with 58% corn, 9% fish meal and 3% fat.  
Meets the needs of piglets from 6 kg

#### Ingredients for the home-mixed feed:

Mosegården can also deliver oatmeal, baby maize, potato protein, soya concentrate, fat and whole milk based milk powder (off. grade) and energy products of high quality for home-mixed feed

#### Delivery:

25 kg bags and in 500 kg + 1,000 kg big bags

The above mentioned products are produced by a Danish supplier

## Feed for piglets:

### Quality feed for your piglets:

With the large number of live born piglets which are attained today, it is more important than ever to ensure that piglets get enough of digestible energy. The complete feed from Mosegården ensures that the piglets' need of energy is met throughout their upbringing

### MasterWean® 5

Is given to piglets from day 10 and until maximum 10 days after weaning. Makes it possible to wean without any use of medicine due to the special composition of easily digestible raw materials, enzymes and acids

### MasterWean® 6

Is given to piglets from 6 kg up to 10 kg. Makes it much easier to change from colostrum to solid food. The blend also consists of easily digestible and heat-treated raw materials

MasterWean® 5 and 6 can be delivered in both meal and 2 mm pellets

### MasterWean® Flakes

Is given before weaning and for piglets weaned at the weight of 5-6 kg. The feed is very appetising and contains oatmeal, cornflakes and whole milk powder. Can also be used in the farrowing section as floor feeding

All blends can be delivered with extra zinc by prescription from the veterinarian

### Good advice when feeding piglets:

It is recommended to feed the piglets a least 4 times a day no matter if dry or soft food are used. From their time with the sow, the piglets are used to eat a lot of times daily and always at the same time, which is why there must be enough feeding points.

The feed must be adjusted to the weight and age of the piglets. Feed the piglets before weaning so that they more easily can absorb the feed at weaning.

Remember to allocate water!
