

MG Milk Trolleys

MG milk trolleys are available in many different variants. The Trolleys are built up from individual wishes and needs:

MG STANDARD MILK TROLLEY

Standard milk trolleys come with stainless steel tanks and frames that ensure easy cleaning, low maintenance costs and a long life.

MG SPECIAL MILK TROLLEY

Special milk trolleys are built on a A. Flensburg El-Truck and come with stainless steel tanks and painted frame.

Acquisition options:

- With heater
- With mixer

MG STANDARD MILK TROLLEY

MG SPECIAL MILK TROLLEY

MG STANDARD MILK TROLLEY is without heat and mixer. It is ideal for already heated milk and short distances.

MG HEATING TROLLEY is fitted with a thermostatically controlled water bath under the milk tank. The water bath on the trolley is heated by a heat exchanger which ensures the milk is fed at the correct temperature. The water bath also ensures that the milk does not burn and makes the cleaning easy. MG Heating Trolley can also be equipped with a mixer if desired.

MG MIXER TROLLEY is fitted with a mixer, which ensures a quick and good mixing of milk replacer.

MG SPECIAL MILK TROLLEY is based on the known A. Flensburg Electric Truck. It is battery powered (12, 24 or 48 V battery) and is easily controlled from the driver's console. Can individually be equipped with heating, mixer and feeding pump. MG Special Milk Trolley makes it easy to get around with even large quantities of milk. The tank is available in sizes from 100 ltr to 1,000 ltr.

MG PLASTIC TANK can be based on a A. Flensburg Electric Truck, but can also be transported by pallet forks or a trailer. MG Plastic Tank is isolated and keeps the temperature in even the coldest winter months. The inner surface of the plastic tank is very smooth and makes it very easy to clean. MG Plastic Tank can also be fitted with a mixer and feeding pump if desired.

MG Milk Trolleys - Specifications

Material:

The trolleys come with large rubber wheels which makes the trolleys easy to drive and they are even on rough terrain very stable.

Cleaning:

The simple design of the trolleys in stainless steel makes the cleaning after use easy and provides a good hygiene.

Size tank:

Standard milk trolleys can be ordered with:

- 100, 180 or 280 ltr tank

Special milk trolleys can be ordered in all sizes:

- from 100 ltr up to 1.000 ltr tank

Equipment:

The trolleys are provided with a thermometer, which ensures the milk is fed at the correct temperature.

Standard tanks in sizes 100, 180 and 280 ltr come with a liter scale, so the milk level in the trolleys can be easily detected.

All the models are provided with a lid, so that the milk can be kept warm for a longer time.

Extra equipment:

- **Feeding pump with tap pistol** which makes the feeding easy.
- **Dosing pump** - ensures an even feeding, and the desired amount of milk can easily be set. Liter volume can be set between 0.5 to 5 ltr with ½ ltr interval. The pump can also pump without any limitation.
- **Colostrum container** is available for standard tanks - the colostrum can be brought separately in the container.

Spare parts for MG Milk Trolleys

Liter scale

Rubber tap

Colostrum container

Propeller

Wheels

Heat exchanger 3kW/10kW

Mixer engine

Pump kit with or without dosing control. Can be fitted after.

Pump for feeding of milk or liquid feed
